mechanism built into the camera body. stabilization. PENTAX STAR SERIES LENS: A newgeneration, high-performance Starseries lens delivering superb imaging quality and exceptional resolving power. HIGH IMAGE QUALITY: By using three

super ED glass lens and aspherical lens

with less chromatic aberration. Thanks

elements, a clear image is achieved

to the 12 elements, sharp images are captured even at the edges at any given focal length. HD COATING TO ENHANCE IMAGING POWER: Produce high-contrast images with edge-to-edge sharpness and free of flare and ghost images. NEWLY DEVELOPED RING-TYPE **ULTRASONIC WAVE MOTOR SDM:** Generating a torque approximately 1.3

times that of the unit installed in the HD PENTAX-D FA★50mm f1.4 SDM AW, this new SDM assures flawless, high-speed autofocus operation. • ALL WEATHER (AW): This lens features

a dependable dustproof, weatherresistant structure to prevent the intrusion of water and dust into the

lens interior. ROUNDED DIAPHRAGM: Nine-blade, round-shaped diaphragm to produce a natural, beautiful bokeh (defocus) effect up to an aperture of F2.8. • SUPER PROTECT COATING: PENTAXoriginal SP coating uses fluorine treatment on the front surface of the lens. This prevents adhesion of dust,

water drops, grease and other substances. KAF4 MOUNT: This lens features a KAF4 lens mount compatible with an electromagnetic diaphragm control system. Cameras compatible with this system are K-1 Mark II, K-1, K-3 II, KP,

K-70, K-3, K-S2, K-S1 and K-50. For K-1, K-3 II, K-3, K-S2, K-S1 and K-50, the camera's firmware must be upgraded

WHAT'S IN THE BOX: Includes Front

lens cap O-LC82, lens mount cap, Lens Hood PH-RBG82 and Lens case S130-

to the latest version.

scenes and scenic photography. It helps the camera to produce a bright, clear viewfinder image that will inspire the photographer's creativity and imagination. 2. State-of-theart optical technology This lens incorporates three Super ED (Extra-low Dispersion) glass optical elements to effectively minimize chromatic aberration, and a glass-molded aspherical optical element to effectively compensate for spherical and comatic aberrations and field curvature to deliver extra-clear, high-contrast images with edge-to-edge sharpness, even at open aperture. It also reduces distortion to nearly zero at a focusing distance of four meters to deliver well-defined, distortion-free images over the entire focusing range, from the minimum focusing distance to infinity. This lens is also treated with high-grade, multi-layer HD* Coating, which reduces average reflectance in the

resolving power — two factors absolutely essential in the next-generation Star series. It provides exceptionally high imaging performance even at open aperture, a beautiful bokeh (defocus) effect and outstanding image rendition at close ranges — all reasons why it produces high-quality, well-defined images. It also boasts an extra-large F1.4 maximum aperture, useful with many different subjects in a range of applications, including portraiture with an effectively defocused background, handheld shooting of indoor

visible ray spectrum to less than 50% of conventional multi-layer coatings, effectively reducing flare and ghost images to a minimum even in demanding lighting conditions such as backlighting. * HD is the abbreviation of High Definition. 3. Newly designed, large ring-type SDM In order to deliver the highest image quality possible over the entire focusing range — from the minimum focusing distance to infinity — this lens features an newly designed, large ring-type SDM to efficiently drive the focusing mechanism,

which consists of a larger number of optical elements than ordinary lenses, and is required to shift heavy rear-optical-element groups in unison. Generating a torque approximately 1.3 times that of the unit installed in the HD PENTAX-D FA \$\pm\$50mm f1.4 SDM AW, this new SDM assures flawless, high-speed autofocus operation. 4. Dustproof, weather-resistant construction Developed as an AW (All Weather) model, this lens features a dependable dustproof, weather-resistant construction with eight special seals to

prevent the intrusion of water into the lens barrel. When paired with a dustproof, weather-resistant PENTAX digital SLR camera body, it assures a durable, reliable digital

PENTAX

imaging system that performs superbly in demanding shooting settings — even in rain or mist, or at locations prone to water splashes or spray. 5. Other features · Nine-blade,

round-shaped diaphragm to produce a natural, beautiful bokeh (defocus) effect up to the F2.8 aperture setting, while minimizing the streaking effect of point light sources Exterior design that facilitates focus-ring operation in manual-focus shooting and provides a firm hold · Electromagnetic diaphragm-control mechanism** for flawless, highprecision exposure control during video recording · SP (Super Protect) coating to keep the front surface free of dust and spots ** This mechanism is available when the lens is
