

“Wow! I shot it and it's still there!”

ASAHI-PENTAX

the only single-lens reflex with instant-return mirror

The wonderful Asahi-Pentax gives you continuous viewing before and *after* you shoot the picture. The instant-return mirror flips up only during the instant of exposure—and back again to give you an unbroken view of the subject. This feature, exclusive to Asahi-Pentax, eliminates image-blackout—previously a big disadvantage of single-lens reflex cameras. Single stroke film transport lever also recocks

shutter; Fresnel lens, eye-level viewfinder gives big image that's sharp and clear right to the corners; screw mount accepts pre-set lenses from 35mm to 1000mm; focal plane shutter with speeds from 1 second to 1/500 make the superbly built Asahi-Pentax the smoothest working, most efficient 35mm single-lens reflex camera available. See the *Asahi-Pentax* at your dealer's now. Prices start at \$159.50.
